Quality Air Solutions

Compressed Air Filters

Premium air purity for silicone-free applications

Superb quality air is a prerequisite in order to safeguard your instruments and ultimately your end product. Yet, when air is compressed, the concentration of dirt particles, oil carryover and moisture increases. To efficiently reduce all types of contamination with minimal pressure drop, Atlas Copco has designed a complete range of innovative filtration solutions for silicone-free applications such as painting. These filters are free from substances that could cause defects in the paint and clear your compressed air stream from solid particles that could cause contamination.

YOUR BENEFITS:

- → Maximum contaminant removal
- → Significant energy savings
- → Limited system operating costs
- →Increased reliability
- →Easy maintenance
